

EU Funding in Brandenburg

ESF in BRB

Project Title:

Employment of a working student as part of a company innovation project.

Objectives and (Expected) Results:

Creation of new 3D master models of semi-finished products and drawings for the 3D production conversion. The simulated and visualized first clamping situation on the machine is intended to increase the repeatability of the individual work steps to realize a completely digitalized manufacturing process.

Funded by the European Union and the state of Brandenburg.

**Co-financed by the
European Union**
